

## REGGIANI IRIS Plus Water-based Disperse Sublimation Inks for Digital Textile Printing

### Add a Plus to your sustainable sublimation printouts!

The new EFI™ Reggiani IRIS Plus Disperse Sublimation inks guarantee stunning printing quality and high chroma to your digital textile printing. Plus, they are dual-use inks that perform astonishingly well whether used in sublimation or direct printing.

Designed to leverage EFI Reggiani digital printers' market-proven industrial performance capabilities, these eco-friendly, water-based inks ensure an extraordinary level of print durability, longer life of print heads, and reduced maintenance costs.

Thanks to the finest chemistry, IRIS Plus inks guarantee superior high-temperature stability and are ECO PASSPORT by OEKO-TEX® and REACH certified, and respect highest standards for sustainable textile production. Also, ink tanks are now made of 100% recyclable PE for an eco-friendlier footprint.

## Application

Great performance for sublimation as well as direct-to-fabric printing for different applications such as fashion, sportswear, home textile, and accessories.

## Procedure

- Transfer printing: the printed paper must be transferred hot, through calender or press, at a temperature ranging from 200–210°C, for 30–60 seconds
- Direct printing onto the fabric, followed by colour drying and fixing (through heat press or calender) at a temperature ranging from 190–210°C, for 30–60 seconds. Direct printing allows a better penetration of the ink during the heat-fixing process

EFI Reggiani IRIS Plus inks are available in the following colours:
